KARAN SINGH

Computer Science Student | Bengaluru, India

karan.singh@example.com | +91 90000 45678 | github.com/karan-singh-example

SUMMARY

Final-year computer science student who enjoys building and evaluating machine learning models.

EDUCATION

B.Tech. Computer Science (pursuing), Kaveri Institute of Technology, Bengaluru, 2023 - 2027, CGPA 8.9

PROJECTS

Loan Default Predictor - gradient boosting model in scikit-learn on 50,000 loan records, ROC-AUC 0.87

- Cleaned and engineered features with pandas and NumPy; compared models with cross-validation

Review Sentiment Classifier - fine-tuned a small transformer in PyTorch on 20,000 product reviews (NLP)

Campus Canteen Forecast - forecasted daily meal demand with a time-series model; cut food waste in a pilot

EXPERIENCE

Machine Learning Intern, Cedar Analytics, Bengaluru (May 2025 - Jul 2025)

- Built a churn baseline in scikit-learn and documented the evaluation in Jupyter notebooks

SKILLS

Python, pandas, NumPy, scikit-learn, PyTorch, NLP, Jupyter, Git, SQL (basic)

ACHIEVEMENTS

Top 5% in the college data science hackathon, 2025
