# ARJUN MEHTA

Senior Backend Engineer | Bengaluru, India

arjun.mehta@example.com | +91 90000 23456 | github.com/arjun-mehta-example

## SUMMARY

Backend engineer with six years of building Python services, APIs and data models for payments and logistics products.

## EXPERIENCE

Senior Backend Engineer, Bluepeak Payments, Bengaluru (Apr 2022 - Present)

- Designed REST APIs in FastAPI for a payouts service handling 2 million requests a day
- Modelled ledgers in PostgreSQL and cut slow queries by 70% with indexing and partitioning
- Moved services to Docker containers deployed on AWS ECS with GitHub Actions pipelines

Backend Engineer, Trailhead Logistics, Pune (Jul 2020 - Mar 2022)

- Built Django services for shipment tracking and a public partner API
- Added Redis caching and Celery workers for label generation

Software Engineer, Quillsoft Technologies, Pune (Aug 2019 - Jun 2020)

- Maintained Python ETL jobs and internal admin tools
